AI-generated report would get a straight zero.

Please follow the link and implement the tutorial as given in LLVM portal.

<https://llvm.org/docs/tutorial/MyFirstLanguageFrontend/index.html>

Prepare a concise technical report (**ACM, Single-column format**) on the implementation that **MUST** reflect your understanding on the relevant theory covered in class. The report could include:

- Lexical analysis theory and Syntax analyzer theory
- Efficient language design strategies
- Any new changes you made in the Kaleidoscope implementation
- Any new feature you introduced in the Kaleidoscope implementation
